DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 4 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by *Industrial & Engineering Chemistry Product Research and Development* (1968), 7(1), p. 17-21 (CAPLUS abstract). The reference teaches applicant's compound: RN= 6804-37-1.

Allowable Subject Matter

Claims 1-3 are allowed. The following is a statement of reasons for the indication of allowable subject matter:

The closest prior art appears to be US 5,003,039, which generically teaches applicant's compounds (column 2 line 28). However, case law seems clear that even though a claimed compound may be encompassed by the generic disclosure of a reference, the compound is not obvious without some suggestion in the reference for choosing the particular set of variables which would give rise to the compound. *In re Baird*, 16 F. 3d 380, 29 USPQ (BNA) 1550, 1552 (Fed. Cir. 1994); *In re Ochiai*, 71 F.3d 1565, 1569, 37 USPQ2d 1127, 1131 (Fed. Cir. 1995). All examples in the cited prior art

Art Unit: 1621

are drawn to cyano-derivatives (which are not taught by the instant invention).

Furthermore, the instant provisos are not taught by the prior art, that is, all possible orientations of the hetero atom substituents on the benzene rings are contemplated – in marked contrast to the instant invention.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: US 4,864,008, US 5,750,789 and JP 07026018 (CAPLUS abstract) are cited to show related compounds.
